

## Do you want a Media Centre?

Everything in one place?

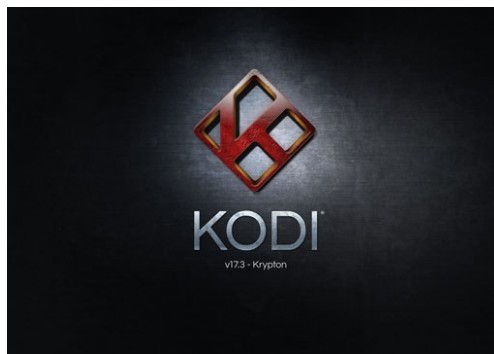

- TV Shows
- Movies
- Live TV
- International TV
- Music
- Sports

Your whole Multi Media collection in one spot?

Then you need my Custom, made for  
Australia :

## **“Fully Loaded KODI BOX”**

# **only \$150.00**

### **How does it work?**

I take a normal Android Box and update the Firmware and Operating System to the latest Version. Then add the best Pro, Ad-Free, App's on the market. Finally create a custom build for Kodi & tweak the settings to make it play in Australia.

This has Streaming service's and needs at least 3 MB/s (Download) just like Youtube.

### **Copyright Infringement:**

**Only watch media that you have the right's to watch.  
i.e. You paid for it!**

**Australian copyright Law states you can buy from around  
the world and use it here in Australia. Like a DVD from the  
U.S. (Region 1) won't play on Australian (Region 4) players  
so it is allowed to break the Region lock to play it.**

As I don't know what's in your collection, I have left everything available. I leave it to **you** to use this product in a lawful and legal way.

I take no legal or moral responsibility for your actions.
